

1. (Currently Amended) A fitting for attaching a louvre to a hanger, comprising:  
a first leaf integrally connected to a second leaf a one-piece plastics moulding  
comprising two leaves, connected by a pair of hinge sections extending moulded  
integrally between the two leaves, which hinge sections are pivotable about an axis and  
are separated from one another by a recess disposed in each leaf, aligned with each  
other; said fitting further comprising

clip means for attaching the fitting elipping the leaves to a louvre-in-use, which  
means include a first mating portion disposed on the first leaf and a second mating  
portion disposed on the second leaf, wherein at least one of the first mating portion and  
the second mating portion are positioned to extend through an opening within the louvre  
and which first and second mating portions clip together to attach the first and second  
leaves together and the fitting to the louvre;

an eye disposed at a base of the recess, which eye is operable to receive the  
hanger; and

voile attachment means for attaching a voile to the both leaves of the fitting in use  
a manner that the fitting supports the voile.

Claims 2 and 3. (Cancelled)

Please cancel claims 4-9

10. (Currently Amended) A fitting as claimed in claim 9 wherein the fitting  
extends substantially over the entire width of a louvre in use.

Please cancel claim 11.

Claims 12-13. (Cancelled)

Please cancel claims 14-16.

17. (Currently Amended) A fitting as claimed in claim 16 wherein the voile attachment means is positioned to attach at least a portion of the voile across the recess and thereby conceal the eye disposed at the base of the recess arranged such that, in use, a voile extends across, and covers, the recess.

18. (Original) A fitting as claimed in claim 17 wherein the voile attachment means is provided on either side of the recess.

Please cancel claim 19.

20. (Cancelled)

Please cancel claims 21 and 22.

23. (Currently Amended) A fitting as claimed in claim ~~22~~ 1 wherein the ~~or each post~~ at least one of the first mating portion and the second mating portion that is positioned to extend through the opening within the louvre is at least part circular in section to avoid stress concentrations in the louvre ~~in use.~~

Please cancel claims 24 and 25.

Claims 26 – 28 (Cancelled).

Please cancel claims 29-31.
